

PAST/CURRENT PROJECTS:

HEAVY CONSTRUCTION AND ENVIRONMENTAL REMEDIATION

COEUR D'ALENE BASIN PROPERTY REMEDIATION

Period of Performance: July 2006 – November 2009

This Idaho Department of Environmental Quality property remediation project consists of soil removals, barrier placement, and replacement of up to 12" of soils in yards, and/or replacement of clean gravel for driveways, parking areas, and right-of-way. Garden areas included excavation and/or replacement of 24" clean soil.

FC excavated and transported contaminated materials from the project sites with subsequent hauling and placement of "clean" materials. Tasks performed were general grading, backfilling with clean soil and / or gravel, sod/reseed areas backfilled with growth media. This project involves a base year contract with three option years
