

Ferguson Contracting

STATEMENT OF QUALIFICATIONS

Ferguson Contracting is a federal 8(a)-certified business located in Kellogg, Idaho, established in 2001. We are also a Small Disadvantaged Business in the federal government's SDB program and are HubZone-certified. We have recently received Disadvantaged Business Enterprise (DBE) certification for Idaho and are currently seeking DBE certification for both Washington and Montana.

We are a general contractor focusing primarily on heavy construction and environmental remediation, performing work in Idaho, Washington, and Montana. We have access to a diverse range of subcontracting disciplines and are able to provide turn-key and design/build projects. In addition, we are also capable of self-performing a multitude of activities; a partial list includes site grading, excavation, underground utilities, mine closures, concrete foundations, slabs, and walls, building construction, wetlands restoration, soils capping, yard remediation, environmental remediation, and mine water treatment plant operation and maintenance.

We have also secured professional applicator licenses for the states of Idaho and Washington. We have a wide selection of equipment capable of handling most noxious weed spraying activities.

Our strengths include:

- Wide range of capabilities. We are experienced in environmental remediation, plant operations, general civil construction and engineering design.
- Quality-conscious operations. We consistently produce superior plans, specifications and construction activities.
- Focused operations. With a staff of nine full-time personnel plus a seasonal staff increasing our numbers into the 40 to 50 plus range, we provide individual attention to each project and guarantee a rapid response to client needs.
- Low overhead costs. Our small staff creates cost-effective operations.
- Strong list of subcontractors with established credentials. We will outsource for any and all needs that may arise. Engineers, consultants, and trade craft are all available to Ferguson Contracting at short notice and reasonable rates.
- Experience with multiple government agencies and programs. We have successfully completed projects with various federal, state, and local agencies and are familiar with the differing contracting mechanisms and requirements.
